### EXECUTIVE SUMMARY

Aldeas Infantiles SOS, develops programs for children and families that are delivered in cooperation with governments, civil society and communities with an aim of guaranteeing the rights of children and adolescents to a loving family and community life.

The Uruguay head office had been using a well-known system configuration tool to audit and track changes occurring for a range of devices connected to their network. The IT team were finding the software to be quite complex and the supporting hardware and software required was expensive for a non-profit organization. Open-Audit Enterprise proved to be a cost effective, easy to use network auditing product that could intuitively collect and store the data that was relevant to the organization – saving the IT team significant time and effort.

*Compared to other products, Open-Audit Enterprise was very easy to set up. In less than an hour I had installed with minimal configuration.*

Aldeas Infantiles IT department are managing a growing office environment incorporating BYOD and a variety of Servers, Routers, Switches, Firewalls, Desktop PCs, Laptops, Printers and other personal devices.

They required a product that would cater for their current environment and would be able to scale and adapt to their future

### THE AUTOMATED SOLUTION NEEDED TO TELL THEM:

- What devices are connected to their network;
- How the devices are configured;
- If there have been any configuration changes.

### THE SOLUTION NEEDED TO BE:

- A low cost solution that would not rely on proprietary hardware, software or operating systems to run;
- Easy to implement;
- Low maintenance;
- Interactive and Intuitive with a GUI that would be simple

## THE SOLUTION

Aldeas Infantiles put Open-Audit Enterprise to the test against some other open-source tools and quickly found that the only complete and easy to manage solution was Open-Audit. The free 20-device enterprise license gave the organization a chance to test some of the advanced analysis, reporting and scheduling features and they quickly decided that the enterprise version would be the

*Open-Audit Enterprise allows me to have complete control of my network automatically and keep a history of the changes*

FirstWave is a publicly-listed, global technology company formed in 2004 in Sydney, Australia. FirstWave's globally unique CyberCision platform provides best-in-class cybersecurity technologies, enabling FirstWave's Partners, including some of the world's largest telcos and managed service providers (MSPs), to protect their customers from cyber-attacks, while rapidly growing cybersecurity services revenues at scale.

In January 2022, FirstWave acquired FirstWave Limited (FirstWave), a leading provider of enterprise-grade network management, automation and IT audit software, with 150,000 organisations using their software across 178 countries and enterprise clients including Microsoft, Telmex, Claro, NextLink and NASA.

Integrating CyberCision with FirstWave's flagship Network Management Information System (NMIS) and Open-Audit product enables FirstWave to provide a comprehensive end-to-end solution for network discovery, management and cybersecurity for its Partners globally.

With over 150,000 organisations now using FirstWave technology, we are well positioned to be a leader of transformational change in the IT Operations and Cybersecurity world.
